MERN Practical

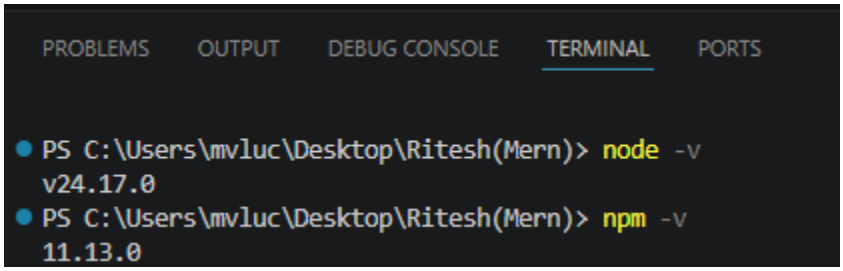

Practical – 1

Roll No.:T005	Name:Ritesh Chaubey
Class:TYIT	Batch:1
Date of Assignment:20/06/2026	Date/Time of Submission:20/06/2026

AIM: Environment Setup and JavaScript Basics

A: Install Node.js and Visual Studio Code, and verify installation.

OUTPUT:

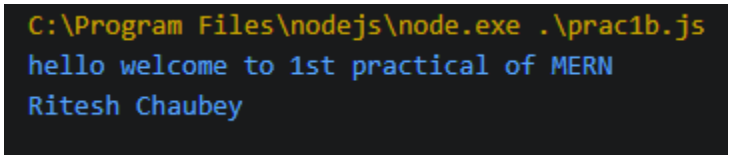

B:Create a simple Node.js file and run it using the terminal

CODE:-

```
console.log("hello welcome to 1st practical of MERN");

console.log("Ritesh Chaubey")
```

OUTPUT:

C. Write a Node.js script demonstrating basic JavaScript commands (console log, variables, and arithmetic operations).

Code:-

```
console.log("Welcome to mern");

let a=20;

let b=10;

console.log("Num1:",a);

console.log("Num2:",b);

console.log("addition:",a+b);

console.log("subtraction:",a-b);

console.log("Multiplication:",a*b);

console.log("division",a/b);

console.log("Modulous:",a%b);
```

OUTPUT:-

```
[Running] node "c:\Users\mvluc\Desktop\Ritesh(Mern)\prac1c.js"
Welcome to mern
Num1: 20
Num2: 10
addition: 30
subtraction: 10
Multiplication: 200
division 2
Modulous: 0
```

D:**Create and run a simple program using variables and functions.**

Code:

```
let num1 = 15;

let num2 = 25;

function add(a , b){

   return a + b;

}

function multiply(a , b){

   return a * b;

}

console.log("1st number: ", num1);

console.log("2nd number: ",num2);

console.log("Addition = ", add(num1 , num2));

console.log("Multiplication = ", multiply(num1 , num2))
```

OUTPUT:

```
[Running] node "c:\Users\mvluc\Desktop\Ritesh(Mern)\prac1d.js"
1st number:  15
2nd number:  25
Addition =  40
Multiplication =  375
```

E. Demonstrate use of operators and control statements in JavaScript

CODE:

```
let a = 30;
let b = 20;
let day = 2;

//Comparison Operators
console.log("\nComparison Operators");
console.log("a > b :", a > b);
console.log("a < b :", a < b);
console.log("a == b :", a == b);
console.log("a != b :", a != b);

//if-else Statement
console.log("\nIf-Else Statement");
if (a > b){
  console.log("a is greater than b");
}else{
  console.log("b is greater than a or equal to a");
}

console.log("\nSwitch Statement");
switch(day){
  case 1:
    console.log("Monday");
    break;

  case 2:
    console.log("Tuesday");
    break;

  case 3:
    console.log("Wednesday");
    break;

  default:
    console.log("Invalid Day");

}
```

Output:-

```
[Running] node "c:\Users\mvluc\Desktop\Ritesh(Mern)\prac1c.js"

Comparison Operators
a > b : true
a < b : false
a == b : false
a != b : true

If-Else Statement
a is greater than b

Switch Statement
Tuesday
```

F. Write programs using loops and template literals.

CODE:

```
let number = 7;

console.log(`Multiplication Table of ${number}`);

for (let i = 1; i <=10; i++)

{

    console.log(`${number} x ${i} = ${number * i}`);

}
```

OUTPUT:

```
Multiplication Table of 7
7 x 1 = 7
7 x 2 = 14
7 x 3 = 21
7 x 4 = 28
7 x 5 = 35
7 x 6 = 42
7 x 7 = 49
7 x 8 = 56
7 x 9 = 63
7 x 10 = 70
```
