Task:

Code:-

```
import { useEffect, useState } from "react";
function App() {
  const [users, setUsers] = useState([]);
  const [search, setSearch] = useState("");
  useEffect(() => {
    fetch("https://dummyjson.com/users")
      .then((response) => response.json())
      .then((data) => {
        setUsers(data.users);
      })
      .catch((error) => {
        console.error("Error fetching users:", error);
      });
  }, []);
  const filteredUsers = users.filter((user) =>
    user.firstName.toLowerCase().includes(search.toLowerCase())
  );
  return (
    <div>
      <h1>Users List</h1>
      <hr />
      <input
        type="text"
        placeholder="Search user..."
        value={search}
        onChange={(e) => setSearch(e.target.value)}
      />
      <ul>
        {filteredUsers.map((user) => (
          <li key={user.id}>
            <strong>
              {user.firstName} {user.lastName}
            </strong>
            <br />
            Email: {user.email}
            <br />
            Age: {user.age}
          </li>
```

```
      ))}
    </ul>
  </div>
 );
}
export default App;
```

Output:-
